OCTOBER IS NATIONAL SCA AWARENESS MONTH

You Can Save a Life from Sudden Cardiac Arrest

CALL • PUSH • SHOCK

SUDDEN CARDIAC ARREST (SCA) IS
A NATIONAL PUBLIC HEALTH CRISIS
AFFECTING OVER 356,000 PEOPLE
EACH YEAR, INCLUDING 7,000
YOUTH UNDER AGE 18.

Sudden cardiac arrest is a life-
threatening emergency that occurs
when the heart suddenly stops beating.
When SCA happens, the person
collapses and doesn't respond or
breathe normally. They may gasp or
shake as if having a seizure.

Survival depends on the quick
actions of people nearby calling 911,
starting CPR and using an AED, if
available, as soon as possible.

Every second counts!
SCA leads to death in
minutes. If the person does
not get help right away.

You can triple a person's
chance of survival from SCA by
starting CPR immediately.

Push hard and fast in the center of the chest,
100 to 120 compressions per minute.

AEDs are meant for anyone to use.
Follow the step-by-step audio/visual
instructions and remember that an AED
cannot hurt the person, it can only help.

Today only 1 in 10 survives
SCA. But with immediate CPR
and use of an AED, 5 in 10
victims could survive.

7 in 10 SCAs happen at
home... You could save
the life of someone you
love by starting CPR.

CARDIAC ARREST

ELECTRICAL ISSUE
8% OUT OF HOSPITAL SURVIVAL

- unresponsive
- heart malfunctions, blood circulation stops
- loss of consciousness, breathing ceases
- death occurs in minutes without help

HEART ATTACK

CIRCULATION ISSUE
95% OUT OF HOSPITAL SURVIVAL

- often alert & responsive, heart continues to circulate blood
- pain/pressure/squeezing in chest, neck, arm, or jaw
- difficulty breathing, nausea, and profuse sweating present
- impending sense of doom
- caused by obstruction of blood flow in the arteries of the heart

**NOTE: CARDIAC ARREST CAN FOLLOW A HEART ATTACK
OR HAPPEN WHILE SOMEONE IS RECOVERING FROM ONE.**

THE ALIVER FOUNDATION
HELPING HEARTS SINCE 2014
